

Marco Milad Mankaruios | Software Engineer

Cairo, Egypt

☎ (+20) 122-974-9608 • ✉ miladmarco68@gmail.com • 🔗 LinkedIn • 🐙 GitHub

Professional Summary

Software Engineer with 10+ production deployments across healthcare, e-commerce, AI/EdTech, media, legal, and advertising industries. Specializing in React.js, Next.js, TypeScript, and FastAPI — from pixel-perfect enterprise interfaces to full-stack multi-platform products with real domain logic. Shipped production systems across Web, iOS, and Android. Delivered PDPL-compliant, bilingual (Arabic/English) platforms for clients across Egypt, Saudi Arabia, Malta, and the MENA region.

Work Experience

elama.ai — Agentic AI Agency

Cairo (Remote)

Software Engineer / Product Engineer

03/2025 – Present

- Serve as end-to-end Software Engineer on client products — from requirements gathering and business analysis to wireframing, implementation, and post-launch maintenance.
- Own full product delivery across Web, iOS, and Android on live production systems.

The Intern — AI Job Simulation Platform

(Production: Web + iOS + Android)

Tech Stack: React 18, Vite, Tailwind CSS, FastAPI (Python), PostgreSQL, Groq LLMs, Stripe, Capacitor, i18next, FCM/APNs, GitLab CI, Capawesome Cloud

- Platform with 166 routes, 204 API endpoints across 28 routers, serving Web, iOS, and Android from a single shared FastAPI backend (4 uvicorn workers).
- Led full Arabic/RTL localization (EN/AR/FR) across all 3 platforms — implemented with CSS logical properties so a single codebase renders correctly in both directions without forking the UI.
- Ported localization to mobile in 4 disciplined batches (M1–M4): merged ~2,700 lines of translation namespaces, handled 24 verbatim page copies, and hand-merged 16 diverged pages — preserving all Capacitor-native adaptations.
- Resolved a mid-day production AI outage (retired LLM model) by building a self-healing multi-model fallback chain (gpt-oss-120b → compound-mini → compound) with automatic short-circuit on model-not-found errors.
- Fixed critical intermittent OAuth login failures (LinkedIn + Apple) affecting ~75% of sign-ins under multi-worker load — root cause was in-memory state not shared across 4 workers; fixed by backing state with the shared KV store.
- Recovered a lost Android signing key without the original — generated a fresh upload keystore, registered via Play App Signing reset, and published a signed AAB (v1.0.8, build 11) to Google Play.
- Shipped iOS build 11 signed and uploaded to App Store Connect via Capawesome Cloud (Fastlane → TestFlight).
- Built automated cross-branch drift-checks to guarantee Web and Mobile stayed synchronized across all localization batches.

Triple Vision Agency

Cairo

Software Engineer / Front-End Developer (Part-time)

11/2025 – Present

- Served as sole point of contact for 7 international clients, owning architecture and tech-stack decisions end-to-end from discovery to deployment.
- Shipped 9 production-grade projects across healthcare, e-commerce, legal, media, and advertising using React.js and Next.js.
- Translated Figma and Adobe XD designs into pixel-perfect React components, averaging 40+ reusable components per project.
- Leveraged AI-assisted development workflows (Claude Code + Cursor) to accelerate delivery while maintaining clean, scalable component architecture.

Selected Projects:

1- Ray Lab Group — Multinational Healthcare Corporate Website

(Production)

Tech Stack: React.js, TypeScript, Vite, TanStack Start, Tailwind CSS, Cloudflare Workers (SSR)

- Corporate website for a multinational diagnostic healthcare group (Malta HQ) spanning Egypt, Saudi Arabia, and Jordan under 6 brands.
- Architected 7 production pages with 40+ reusable components, deployed on Cloudflare Workers with SSR.
- Developed interactive Investors section with 9 data-driven tabs and an animated SVG network map.
- Built audience routing system directing 3 user types (Investors, Physicians, Partners) to tailored journeys.

2- M.M Bags — Family Business E-Commerce Platform

(Production)

Tech Stack: Next.js 16, React 19, TypeScript 5, Supabase (Postgres/Auth/Storage/RLS), Tailwind CSS 4, Zustand, Vercel

- Built full e-commerce platform for a luggage retailer (est. 1998, 2 branches) with 12 admin surfaces: products, orders, POS, returns, stock, suppliers, purchase orders, reports, reviews, staff, homepage, and newsletter.
- Implemented full returns system with atomic restock, branded PDF purchase orders with WhatsApp send-to-supplier, and admin-controlled homepage merchandising.

- Delivered bilingual Arabic RTL + English UI, full RLS security, and legal pages compliant with Egypt’s PDPL Law 151/2020.

3- Mogohrat Lotfy — Gold & Jewelry Store ERP (Production)

Tech Stack: *Next.js 14, Supabase (Postgres/Auth/RLS), TypeScript, Tailwind CSS, Puppeteer, Vercel*

- Built full ERP with karat-based live gold pricing, per-gram weight calculation, and serialized inventory tracking.
- Engineered POS with Arabic receipts, wholesale B2B credit ledgers, buy-back/scrap tracking, and margin-based profit analytics.
- Implemented full audit trail, role-based access control, and PDF generation via Puppeteer.

Live: [Vercel](#) Code: [GitHub](#)

4- IMRSIV — Immersive Digital Solutions Platform (Completed & Delivered)

Tech Stack: *React.js, TypeScript, Vite, Tailwind CSS, React Router, Framer Motion*

- Marketing SPA for a MENA digital transformation company spanning 3 service lines (Zoho CRM/ERP, Matterport 3D, AI chatbots).
- Engineered 8+ sections including mega-dropdown navbar, animated journey timeline, and interactive equipment selector.
- Built lead capture form with 5+ validated fields using React Hook Form + Zod.

ITI – Information Technology Institute Cairo

Front-End Development Trainee (Part-time) 09/2025 – 12/2025

1- eBay Clone *React.js, Angular, React Native, Tailwind CSS, Firebase*

- Full-stack clone with 7+ features: authentication, wishlist, cart, order placement, and profile management.
- Implemented 5+ additional features: search, order tracking, localization, user ratings, and Stripe integration.
- Developed admin panel with full CRUD across 3 core modules: products, orders, and customers.

DEPI – Egypt (Remote) Remote

Mobile Development Intern 06/2024 – 10/2024

Completed mobile development track covering Android Studio and cross-platform fundamentals in a government-backed digital upskilling program.

Technical Skills

Frontend:	React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, Angular
Styling & UI:	Tailwind CSS, Framer Motion, Responsive Design, RTL/i18n (i18next)
Backend & DB:	FastAPI (Python), Next.js Server Actions, Supabase (Postgres/Auth/RLS), PostgreSQL
Mobile:	Capacitor (iOS/Android), React Native, FCM/APNs, App Store & Play Console
AI & LLMs:	Groq LLMs, multi-model fallback chains, structured AI generation, prompt engineering
Tools:	Git, GitLab CI, Vite, Zustand, TanStack Query, Puppeteer, Stripe, Figma
Deployment:	Vercel, Cloudflare Workers (SSR), Capawesome Cloud, Fastlane, TestFlight
